Definitions

Information Assets – These are assets that consist primarily of databases and data files, contracts and agreements, system documentation, research information, user manuals, training material, operational and support procedures, business continuity plans, fallback arrangements, audit trails, and archived data.

Information assets also include the physical assets, services, resources, software and intangibles that support the proliferation of information within the Plansource global enterprise.

- Software Assets: application software, system software, development tools, and utilities;
- Physical Assets: facilities, computer equipment, communications equipment, removable media, and other equipment;
- Services: computing, communications services and general utilities;
- Personnel: personal qualifications, skills and experience;
- Intangibles: the reputation and image of Plansource.

Information Systems – This is any computer system or application that processes, maintains or stores information used by Plansource to manage their global enterprise.

Restricted Information – Restricted information refers to privileged or proprietary information that only authorized people are allowed to access, as articulated in the Data Classification Policy.

Information designated as “restricted” is deemed to have a profound impact on the business if lost or misused, the result of which may cause severe damage to Plansource’s global enterprise. Restricted information includes Personally Identifiable Information (PII), Protected Health Information (PHI) and customer sourced information.
